LED lighting

Energy-saving LED technology in a timelessly lovely design

weinor LED light bars and accent lights add that special touch to any product from the weinor range, their warm glow creates attractive lighting while allowing any outdoor space to be used for much longer. Based on modern LED technology, the innovative light bars and accent lights can save a great deal of energy. What is more, the light-emitting diodes have a long lifetime of some 30,000 hours, also helping to save resources. weinor LED light bars and accent lights can be operated and even dimmed using BiConnect or Somfy io-homecontrol® radio technology.

LED lighting

LED and LED Design round/square light bars

With their timelessly lovely design, the weinor light bars match more than just weinor products:

- Individual LED lights can easily be replaced
- Energy-saving: 85% lower energy consumption than halogen lighting; Operating life of 30,000 hours
- Dimmable when used with BiConnect or Somfy io-homecontrol® radio control

Size and number of LED lamps

Width of light bar in cm	Number of separate LED spotlights	Width of light bar in cm	Number of separate LED spotlights
150 – 164	2	385 – 439	7
165 – 219	3	440 – 494	8
220 – 274	4	495 – 549	9
275 – 329	5	550 – 604	10
330 – 384	6	605 – 650	11

The LED spotlights in the light bars are generally positioned symmetrically. In the case of multi-section units, the spacing at the section joints may be irregular.

LED RGB Strip

With 60 coloured LEDs per meter and a finely tuned diffuser, the LED RGB Strip bar produces an evenly distributed and pleasant light.

- Selection of 48 colours and 3 whites
- Approx. 4.9 watt output per meter, depending on the set color
- Can be installed anywhere (providing it is sheltered from the rain), max. length 5 metres

NEW: LED accent light

With the LED accent light, interesting light accents can be set on the weinor patio roof, the building facade and in the garden.

- matching the weinor outdoor product with an identical frame colour
- timeless contemporary design for highly varied facades and roof posts
- diverse control unit options
- high quality and long-lasting
- simple installation and retrofitting

LED accent light

Technical data		External control system

Cross-sections

LED light bar

LED Design round/3Spot round light bar

LED Design square/3Spot square light bar

LED Design 3Spot round/square: position of the LED spotlights and cable output

- No LED Design 3Spots round/square shorter than 1640 mm possible.
- An LED Design 3Spot round/square light bar always comprises 3 LED spotlights. No more than 3 light bars can be combined to make one installation.
- Several installations will need to be used if more light bars are required.
- Only one remote receiver is required for the light bar installation.

Tempura heating system

Tempura patio heating – a great performance from a small heater

The weinor Tempura heating system provides pleasant warmth on the patio quickly. It can be mounted anywhere, is easy to retrofit and generates pleasant warmth in the evenings and during the cooler months. The infrared rays can be felt as soon as the system is switched on. There is no lengthy pre-warming process as required with other heaters (e.g. medium wave or dark radiators). When operated using the radio control BiConnect from weinor or Somfy io-homecontrol®, the Tempura heating system can be fine tuned to any level. It can be angled as required to target a specific area and provide pleasing temperatures. The Tempura is available in 2 versions: **Tempura** with its classic round look and **Tempura Quadra** in a modern square design.

Tempura Quadra has been awarded with:

reddot award 2018
winner

Premium quality
made in Germany

Tempura and Tempura Quadra are developed and produced in Germany. The weinor powder coating allows for maximum quality and a vast variety of colours.

Tempura heating Benefits

Tempura heating system – 2 versions for every style of home

You can choose from 2 versions to suit your personal taste: the classic **Tempura** with a rather round look and **Tempura Quadra** in a square design. The compact heating systems blend subtly into any style of architecture and home.

Energy-saving infrared heat as soon as you switch it on

The heating system's warming infrared rays can be felt as soon as the system is switched on. There is no lengthy pre-warming process as required with other heaters (e.g. medium wave heaters). New infrared tubes filter up to 99% of the visible rays in the Tempura Quadra. When operated using the BiConnect or Somfy io-homecontrol® radio control, the Tempura heating system can be fine tuned to any level. Note: Tension-related clicking noises may be heard when the system is switched on or off.

Swivelling housing – easy to install

The heating system's housing can be swivelled up and down to any angle. This allows for perfectly targeted heating. The Tempura and Tempura Quadra can be fitted to any wall using the universal bracket. The Tempura Quadra can also be attached straight to the weinor Opal Design II awning and the round Tempura can be attached to the weinor Semina Life awning using a special bracket.

Tempura Quadra

Housing the radio elements

While the remote receivers can be housed in the optional design bar with the Tempura, they can be integrated into the base with the Tempura Quadra.

Tempura with design bar

Protected against overheating and splash-proof

The Tempura is constructed for outdoor use. No extra splash protection is required, e.g. a pane of glass. TÜV tested, protection rating I, protection type IP 24.
