

Sottezza Skylight + LED

UNDERMOUNTED SKYLIGHT SYSTEM

This Undermount Skylight Roof system is designed to mount flush under a sloping or flat roof and can be used in large scale skylight windows providing the ultimate interior heat protection. Sizes up to 6m width and 5m projection are possible. An amazing solution for the most beautifully designed architectural skylights and glass roofs. Running on a minimum of 0°-45° pitch allows both designer profiles, Sottezza Pure + Sottezza Originale to cover large projections.

The OptiStretch technology makes for taught fabric without the traditional light gaps of other solutions. By far one of the most advanced Undermount Roof systems on the market, German design and quality with integrated LED lights, Sottezza showcases Weinor's world leading German technology.
